

# Boost your 2D Design Productivity

with **DraftSight Professional**

DraftSight® Professional is a powerful 2D design and drafting solution that lets you create, edit, view and markup any kind of 2D drawing. It includes productivity tools, an API, and a familiar user interface that makes it easy to transition from other comparable CAD applications.

## DRAWING COMPARE

*Graphically compare entities between two drawing documents.*

## DIMENSIONING WITH WIDGETS

*Quickly place dimensions with widgets for automatic alignment and spacing.*

## INSERT CENTERLINES

*Effortlessly create a centerline that divides the distance equally between two selected segments.*

## BATCH PRINTING

*Print files or folders of files at once without having to open them*

## IMPORT DGN FILES

*Directly import and convert the DGN file format into a DraftSight project for direct editing.*

## TOOLBOX

*A standards-based mechanical symbol library and mechanical annotation add-on created to insert standard hardware; generate holes; create a Bill of Material and callouts for holes; and add balloons, welding symbols and surface finish symbols.*

## PDF UNDERLAY

*Attach pages of a PDF document to a drawing with the fast AttachPDF command.*

## G-CODE GENERATOR

*Painlessly create the G-Code for the machining of the part with automated machine tools.*

## CURVED TEXT

*Place text along an arc to better control the text direction and location.*

## DRAFTSIGHT APIs & API UPDATES

*If you have automated, customized or integrated your current DWG-based CAD system through LISP, you'll love these APIs that let you customize and automate DraftSight.*

## MACRO RECORDINGS

*The quickest and easiest way to start programming with the DraftSight API is to record a macro, which contains the DraftSight API calls that correspond to the actions performed interactively in DraftSight.*

## UPGRADES

*Convenient annual product upgrades, new releases and service packs.*
