

FAST FACTS: FACILITIES MANAGEMENT WITH DRAFTSIGHT®

Facilities teams around the world rely on DraftSight for a professional 2D design solution. DraftSight makes it easy to be productive with powerful time-saving functionalities, an API to accelerate your design projects, and compatibility with existing drawings and project files. Here's what you can expect when working with DraftSight:

- 1 Best-in-class 2D CAD Solution:** For over a decade, thousands of companies have trusted DraftSight's proven desktop 2D CAD with the productivity tools, functionality, and file compatibility you need to create, edit, view, and mark up any kind of DWG file quickly and efficiently. DraftSight provides comparable, if not greater capabilities than alternative CAD products with the flexibility of network licensing and support for organizations.
- 2 Maximize your investment and increase ROI:** DraftSight helps free up your IT budget for innovation. Whether you are planning spaces or managing assets, you will be able to expand team access to CAD by being able to purchase more 2D seats with lighter hardware requirements or network licenses. With DraftSight, you can increase ROI without sacrificing quality or productivity.
- 3 Easy to use and get started:** One of the biggest requirements in considering a new CAD product is maintaining productivity. DraftSight makes it easy to create, edit, view and mark up any DWG-file with speed and efficiency. Its familiar user interface and common commands enables your team to be acclimated in hours, not days. Your existing blocks, customizations, keyboard shortcuts, LISP routines and Script files will all work just fine.
- 4 Seamless Compatibility and Integrations:** DraftSight is compatible with all common file formats, supporting data exchange throughout the design and development process. Collaborate with interior designers, architects, construction, and project teams, seamlessly integrating into established processes and improving productivity.
- 5 Scalable and Ready for the Future:** 3DEXPERIENCE DraftSight connects your preferred 2D CAD solution to the cloud for access to project management, task assignments, collaboration, and document management. By integrating with the 3DEXPERIENCE platform, it helps overcome common facilities team challenges—drawing signoff, revisions, approvals, distribution, and accessibility to project stakeholders. Connect the right people with real-time information and the right tools—on one unified platform—to make better decisions faster.

"Main thing that I can say about using DraftSight within the team is speed in which we can turn over drawings... It's really important to be able to accurately and quickly capture our floor plans, our offices, evacuation plans, space planning, finding your colleagues or a conference room."

—Treena Landers, NAM East Real-Estate Senior Manager

"Whether you are on the road traveling to a new facility or you're onsite working through a project, you have the ability to work quickly and effectively without having to sit down, open up a PC, and start to coordinate different documents from different sources."

—Kevin Reilley, Americas Facility Specialist
